General Conclusions and Recommendations xv

Opening Address

Seed orchards in crisis
M. Giertych (Kórnik, Poland) 1

Session 1: Juvenility. Chairman, Ronald C. Schmidtling (Gulfport, MS, U.S.A.).

The significance of juvenility for seed orchard management
K.A. Longman (Penicuik, Midlothian, Great Britain) 9

Effect of maturation on loblolly pine breeding and seed orchards
M.S. Greenwood (Orono, ME, U.S.A.) 17

Increase of flowering in Norway spruce (*Picea abies*) by known rootstocks and planting grafts in southern sites
G.H. Melchior (Grosshansdorf, Federal Republic of Germany) 23

Correlations between flowering and some vegetative characteristics of grafts of *Pinus sylvestris*
T. Nikkanen (Punkaharju, Finland) and P. Velling (Helsinki, Finland) 35

Seed cone quality of Nigerian-grown *Pinus caribaea* var. *hondurensis*
O.O. Okoro and D.U.U. Okali (Ibadan, Nigeria) 41

Effects of semi-girdles and gravimorphic treatments on female flower distribution in Scots pine (*Pinus sylvestris*) crowns
G. Kosiński (Kórnik, Poland) 57

Session 2: Physiology of Flowering. Chairman, Georg H. Melchior (Grosshansdorf, Federal Republic of Germany).

The promotion of flowering in forest trees by gibberellin $A_{4/7}$ and cultural treatments: a review of the possible mechanisms
R.P. Pharis (Calgary, Alta., Canada), J.E. Webber and S.D. Ross (Victoria, B.C., Canada) 65

Development of Douglas-fir apices under natural and cone-inducing conditions
J.N. Owens (Victoria, B.C., Canada) 85

Changes in the development of apical meristem of *Pinus sylvestris* in response to gibberellin application
A. Hejnowicz (Kórnik, Poland) 99

A survey of the timing of bud development and cone initiation in *Pinus contorta* growing in central Scotland
C.J. Couper (Edinburgh, Great Britain) 107

Cytokinin level and flowering in Douglas-fir
J.B. Zaerr (Corvallis, OR, U.S.A.) and M. Bonnet-Masimbert (Olivet, France) 115

Effect of spraying with gibberellin $A_{4/7}$ on flowering and endogenous gibberellin content in buds of Scots pine (*Pinus sylvestris*) grafts
W. Wesoły (Poznań, Poland) 121
A study of pH gradients in crowns of spruce and pine relative to flowering
H. Fober (Kórnik, Poland) 129

Session 3: Floral Induction. Chairman, John N. Owens (Victoria, B.C., Canada)
Floral induction in conifers: A review of available techniques
M. Bonnet-Masimbert (Olivet, France) 135
Promotion of cone and seed production by gibberellin $A_{4/7}$ and distribution of pollen and seed cones on Sitka spruce grafts in a clone bank
J.J. Philipson (Roslin, Midlothian, Great Britain) 147
Promotion of flowering using exogenous plant hormones in tropical pines
W. Sirikul and O. Luukkanen (Helsinki, Finland) 155
Preliminary results on gibberellin induction of flowering of seedlings and cuttings of Norway spruce indicate some carry-over effects
M. Bonnet-Masimbert (Olivet, France) 163
Stimulation of Scots pine seed crop with bioactive substances in Estonia
M. Kurm (Estonian S.S.R.) 173
Stimulation of flowering in Scots pine (*Pinus sylvestris*) grafts by gibberellin injection
W. Chałupka (Kórnik, Poland) 177
Effects of fertilizer and herbicide application on the growth and cone production of Scots pine seed orchards in Finland
J. Mikola (Vantaa, Finland) 183
The effects of fertilization on flowering of various-sized black spruce (*Picea mariana*) trees (abstract)
R.F. Smith (Fredericton, N.B., Canada) 189
Effect of mineral fertilization on flowering of Scots pine (*Pinus sylvestris* L.) grafts
W. Wesoły, K. Urbański and W. Barzdajn (Poznań, Poland) 191

Session 4: Crop Protection and Economic Problems. Chairman, Veikko Koski (Vantaa, Finland)
Protection of pine seed orchards in the southeastern United States
D.L. Bramlett (Macon, GA, U.S.A.) 199
Increasing seed yield and genetic efficiency in Douglas-fir seed orchards through pollen management
J.E. Webber (Victoria, B.C., Canada) 209
Cone production and stand density in young *Larix occidentalis*
R.C. Shearer (Missoula, MT, U.S.A.) and W.C. Schmidt (Bozeman, MT, U.S.A.) 219
Genetic composition of seed orchard crops
A.E. Szmidt (Kórnik, Poland) 227
Flowering and seed production of clones and their stimulation in seed orchards
J. Danusevičius (Kaunas, Lithuanian S.S.R.) 233
Empty seed production in European larch (*Larix decidua*)
G. Kosiński (Kórnik, Poland) 241
Feasibility of seed orchard establishment, rogueing and lifespan
C. Matyas (Szombathely, Hungary) and R.M. Rauter (Toronto, Ont., Canada) 247

Session 5: Climatic Relationships. Chairman, Władystaw Chałupka (Kornik, Poland)

Climate and the choice of seed orchard sites
V. Enescu (Bucharest, Romania) 257

Long geographic transfers, a possible way of eliminating pollen contamination in advanced-generation seed orchards of *Pinus sylvestris*
V. Koski (Vantaa, Finland) 267

Locating pine seed orchards in warmer climates: benefits and risks
R.C. Schmidtling (Gulfport, MS, U.S.A.) 273
